5   Landmark College's National Science Foundation (NSF)
6 Science and Technology Research Initiative for the Vermont
7 Economy (STRIVE) organization will present Marie Saddlemire,
8 who holds a doctorate in higher education administration from
9 Bowling Green (Ohio) State University, who will lead a workshop
10 from 9:30 a.m. to 12:30 p.m. Tuesday, April 7, for educators at
11 the middle school, high school, and community levels.

12 The workshop, "Creating Neurodiverse STEM

13 Classrooms," blends practical theory with real-world classroom

14 applications, offering concrete strategies and inspiration for

15 supporting learners with a wide range of strengths, preferences,

16 and needs, wrote organizers in a news release. They said

17 participants "will explore and build a strong foundation for

18 integrating Universal Design for Learning (UDL) into STEM

19 classrooms, grounded in UDL's three core pillars: Representation,

20 Action and Expression, and Engagement."

21 This project of the STRIVE award aims to advance

22 inclusive practices in STEM (science, technology, engineering,

23 math) education by offering this professional development

24 opportunity through the college's Institute for Research and

25 Training (LCIRT).

26 Saddlemire will draw on her experiences in curriculum

27 design, accessibility services, and working with neurodiverse

28 students for this workshop.

29 The event is free and open to all and will be held in

30 person at the Brooks O'Brien Auditorium in the Lewis Academic

31 Building at Landmark College. Registration is required at

32 bit.ly/856-strive.
